

**City of Saint Paul**  
**Internet Access and E-Mail Policy**  
**Revised Effective April 7, 2008**

**Internet and E-Mail Policy**

The city provides Internet access and electronic mail (e-mail) capabilities to employees at city expense to further city business. Anyone using the city's Internet access and electronic mail must comply with this Internet Access and E-Mail Policy ("Policy").

The purpose of this Policy is to require the proper use, and to prohibit the improper use of these public resources. This Policy is a minimum standard for the use of e-mail and Internet access, and department and office directors have the authority to apply additional or more restrictive standards to govern specific situations affecting their operations. The city does not intend to create contractual rights by this Policy, and reserves the right to unilaterally change it at any time.

**Privacy**

With regard to the city provided Internet access and e-mail, the city and its officials reserve the right to monitor and/or log all network and Internet activity and e-mail use and content; and to access, review, read, disclose and use all records of use and all content in any way it deems necessary. This monitoring may include, for example, accessing computers, hard drives, disks and adjacent work areas. No person should expect that any message or its contents, or any record of use, whether for city business, personal use or a prohibited use, will be private, even where a personal password is used.

**E-Mail Retention**

E-mail messages and e-correspondence should be considered a permanent, written record that is available for inspection, reading and copying. Everything in email, including calendar and trash, is automatically archived for correspondence retention purposes. General items will automatically be purged from archive after three years unless a litigation hold is in effect. Legal items will automatically be purged from archive after six years unless a litigation hold is in effect. Historical items will remain in archive forever.

**Personal Use of E-Mail and Internet Access**

Incidental and occasional personal use of e-mail and Internet access is tolerated subject to the same policies, procedures and legal considerations that apply to business-related e-mail and Internet use. Incidental and occasional personal use must be done on employee time such as during lunch or breaks. Such personal use is permissible so long as the incremental cost is negligible, no city business activity is preempted by the personal use, and no city policies or laws are violated. Excessive personal use and personal use in violation of this policy can be grounds for discipline up to and including termination. Personal use of the city's Internet access and e-mail constitutes the user's consent to the city to monitor, read, and use in any way any message, record, or other information created by the personal use.

**Applicability to All Users**

This Policy applies to all City Internet and e-mail users including, but not limited to, city employees, whether full-time, part-time, temporary, provisional or otherwise designated. It also applies to all contractors, consultants, volunteers, agents or any other persons who have gained or are given access to the city's Internet service and/or e-mail system.

**Acceptable Uses of Internet Access and E-Mail**

The following are examples of the acceptable use of the Internet and e-mail:

- Communicating and exchanging information directly related to the mission or work tasks of the city department or office;
- Searching the Internet for information relating to current projects or responsibilities required by official job duties;
- Searching for and using information for purposes of job-related training, professional development, or to maintain currency of education;
- Communicating and exchanging information to enhance existing job-related skills and to participate in professional societies, and organizations related to the employee's duties and responsibilities.

**Prohibited Uses of Internet Access and E-mail**

Prohibited uses include, but are not limited to:

- Using e-mail or the city's Internet connection to send, view, store, or receive sexually explicit material. Receipt of unsolicited sexually explicit material does not violate this Policy if the user immediately deletes the material and does not further circulate the material. When necessary for legitimate city business, a department or office director may, in writing, authorize a user to access sexually explicit material;
- Using e-mail or the city's Internet connection for commercial purposes, nongovernmental-related fund raising, or for private gain;
- Soliciting funds (except for activities authorized pursuant to Chapter 41 of the Administrative Code), exchanging political messages, endorsements, opinions or any other similar persuasive activity;
- Harassing, threatening, defamatory, false, inaccurate, abusive, discriminatory, or offensive messages that violate the city's Workplace Conduct Policy, or state or city Human Rights legislation;
- Using e-mail or the city's Internet connection for communication that violates the Minnesota Data Practices Act or any city, state or federal law;
- Defeating or attempting to defeat, through action or inaction, the security system that is set up to protect the city's or other computer systems, unless specifically authorized in writing to do so as part of an employee's official duties;
- Illegal copying, transferring, and/or downloading of pirated and/or copyrighted software or data;

- Installing and/or using shareware, freeware, public domain software, and software distributed via electronic bulletin boards, the Internet, or other online sources, including radio software available on the city's website, unless authorized in writing to do so by the Information Services Manager, or his or her designee.
- Installing or using file sharing programs, especially those programs which circumvent the city's security systems, (including downloading and use of file sharing networks on the Internet such as Napster, Morpheous, Gnutella, Aimster, etc.);
- Installing or using instant messaging and chat programs provided by Microsoft, AOL and others.
- Installing or using "backdoor" communications to the Internet such as having a phone line connected to a modem residing within a PC or laptop computer that is also connected to the city's network infrastructure.

### **Shareware Downloading and Use Exception**

When shareware, freeware, public domain software, or noncity online source constitutes the only practical source of required software, the software is to be thoroughly examined and tested for viruses and approved by the Information Services Manager, or his or her designee, before being installed on city computers.

### **Citywide Messages**

The number and length of citywide messages sent on the city's network should be kept to a minimum. City directors, or their designee(s), must specifically authorize sending citywide messages through the e-mail system. Many citywide messages, which are used to send the same or similar information to every user, should be posted on the city's Intranet (electronic bulletin board) at <http://spnet.ci.stpaul.mn.us/>.

### **Penalty for Noncompliance**

City employees and others who are provided access to the city's Internet connection and e-mail services are responsible for knowing and following this Policy. Any person who violates this Policy for the use of Internet access and e-mail may be removed from Internet access and/or the e-mail system and subject to appropriate disciplinary action up to and including termination. Nonemployees, who are allowed access to the city's Internet connection and e-mail service and who violate these standards, may have their contract revoked. All other legal remedies may be pursued.

**Responsibility for Compliance**

Department and office directors, or their designated representatives, are responsible for enforcing the city's Internet Access and E-Mail Policy. These responsibilities include, but are not limited to:

- Monitoring employee use and reporting suspected noncompliance with the provisions of the city's Policy;
- Revoking service to employees, with or without notice, when deemed necessary for the operation and/or integrity of the city's communications infrastructure and networks;
- Proceeding with appropriate disciplinary action, up to and including discharge, for instances of noncompliance with this Policy;
- Working with Information Services (IS) staff to select and install appropriate Internet filtering software.

The Information Services Manager, or his or her designated representative, will provide the following services in support of this Policy:

- Maintaining Internet filtering software for all city users;
- Providing assistance to department and office directors to enforce the city's Internet Access and Email Policy;
- Assisting department and office directors, as requested, with electronic tools and training to investigate violations of this Policy.

**Effective Date and Consent to Standards**

This revised and updated Policy is effective April 7, 2008. City employees and others who are provided access to city Internet and e-mail access are responsible for knowing and following this Policy. A policy acknowledgment form must be signed by every user of the city's Internet and e-mail system, and kept on file by each department and office director, or their designee, in accordance with appropriate records retention policies. Compliance with the city's Internet and E-mail Policy should be incorporated as part of the annual employee performance appraisal conducted for all employees by all departments and offices.
